## MORE THAN 20 YEARS WORKING ON A CONSTANT EVOLUTION

At Industrias Químicas Tamar we have been committed, since the beginning of the company, more than 20 years ago, to constant evolution. Our great flexibility and ability to adapt has allowed us to overcome all crises and obstacles. We currently have four ranges of products aimed at different sectors: Pool, Home, Fire and Motor.

During these years, we have made a constant investment in facilities and improvement of production capacity to meet the demand for our products and offer a quality service to our customers. In the last 5 years we have increased the production capacity of the different lines by 40%.

Our facilities have an industrial area of more than 8.000 m<sup>2</sup>, dedicated mainly to the manufacture of chemical products, as well as warehouses, logistics, laboratories and offices.

Another aspect that has contributed to the growth of Industrias Químicas Tamar has been the constant investment in R&D. We have a laboratory and a technical department dedicated to the development of new products, quality control and compliance with regulations and legislative requirements. we can guarantee that all our products comply with health regulations and requirements.

## INTERNATIONAL PROJECTION

After strongly consolidating itself at the national level and increasing its production capacity, Industrias Químicas Tamar decides to expand into international markets. Currently, Tamar products are marketed in more than 30 countries spread over all continents. We have a strategic location, close to major seaports, airports and major communication routes, which allows us to export products efficiently and competitively to anywhere in the world.

## PRODUCTIVE CAPACITY

Industrias Químicas Tamar has an excellent production capacity with 4 manufacturing lines:

### LIQUID MANUFACTURING LINE

It has a packaging system in different formats: 1, 2, 5, 20 and 1.000 L, and a production capacity of more than 21.000 L/day.

### COMPACT LINE OF CHLORINE TABLET

Prepared to carry out the entire manufacturing process, from the storage and mixing of raw materials, to compacting and packaging. A production capacity of more than 200.000 tablets/day.

### PRODUCTION LINE GRANULATED PRODUCTS

Composed of mixers and automatic packaging and labeling systems, it allows a production capacity of close to 15.000 Kg/day.

### COMPACT LINE IGNITION TABLETS

Produced with materials of organic origin, Tamar ignition tablets and their production process have received recognition from the Generalitat Valenciana as an example of a sustainable plant.
